

# THE NEW POWER EQUATION

## **IBM iCluster**

*iCluster, an IBM PowerHA solution for IBM i high availability*

*Mark Watts  
IBM - Power Systems  
Sr. iCluster Product Technical Specialist*

*Cliff Sackfield  
IBM - Power Systems  
World Wide Sales and Enablement Lead*

# Agenda

## iCluster - Logical Replication Solution from IBM

- What is it?
- Business Benefits
- iCluster Portfolio
- iCluster Positioning vs other IBM HA offerings
- Architecture
- Features and what it looks like
- Product Roadmap
- Additional Resources

# iCluster, an IBM PowerHA solution for IBM i availability

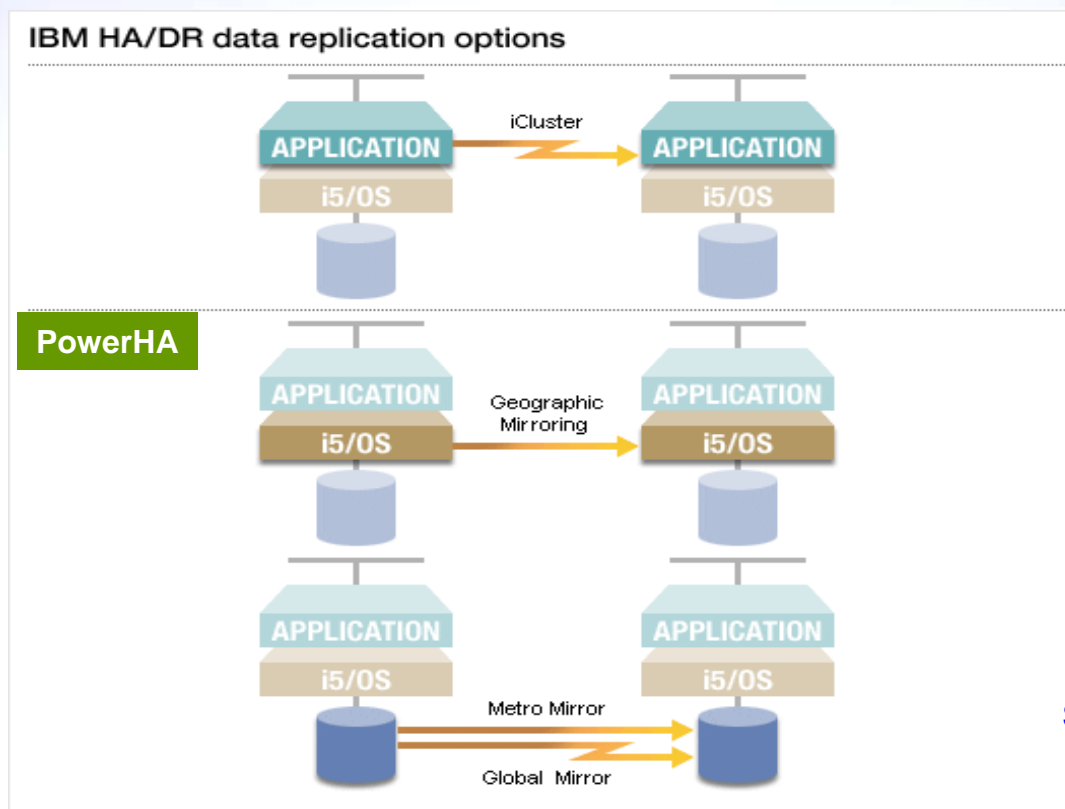

- High availability and disaster recovery solution for IBM System i
  - Replicates data and objects to backup node in real time without impacting system performance
- Business benefits:
  - 24/7 availability of mission-critical applications
  - Automatic system failover in the event of planned or unplanned downtime
  - Workload balancing
  - Offload reporting and other processes to secondary systems

*THE NEW POWER EQUATION |*

# The IBM iCluster for i™ Portfolio

- IBM iCluster for i (5733-ICL) V5R2
  - Full featured System i HA
  - Remote journaling, sync checking, monitoring, alarms and alerts and switchover
  - Auto-configuration command for ease of implementation
  - Scalable from SMB to Large Enterprises
- IBM iBalance for i
  - Chargeable feature of iCluster
  - Provides bi-directional HA for workload balancing on CBU Edition
  - Conflict detection and resolution built in
- IBM Support Line provides support
- IBM LPP
  - Install through RSTLICPGM
  - PTFS from Fix Central

# IBM Data Resiliency Positioning

Logical replication

Asynchronous  
Journal-based replication  
Over TCP/IP  
Disk subsystem agnostic

OS based replication

Synchronous  
IBM i-based replication  
Over TCP/IP  
Disk subsystem agnostic

Storage-based replication

Synchronous or Asynchronous  
Storage-based replication  
Over Fibre Channel or FCIP  
DS8000, DS6000

THE NEW POWER EQUATION |

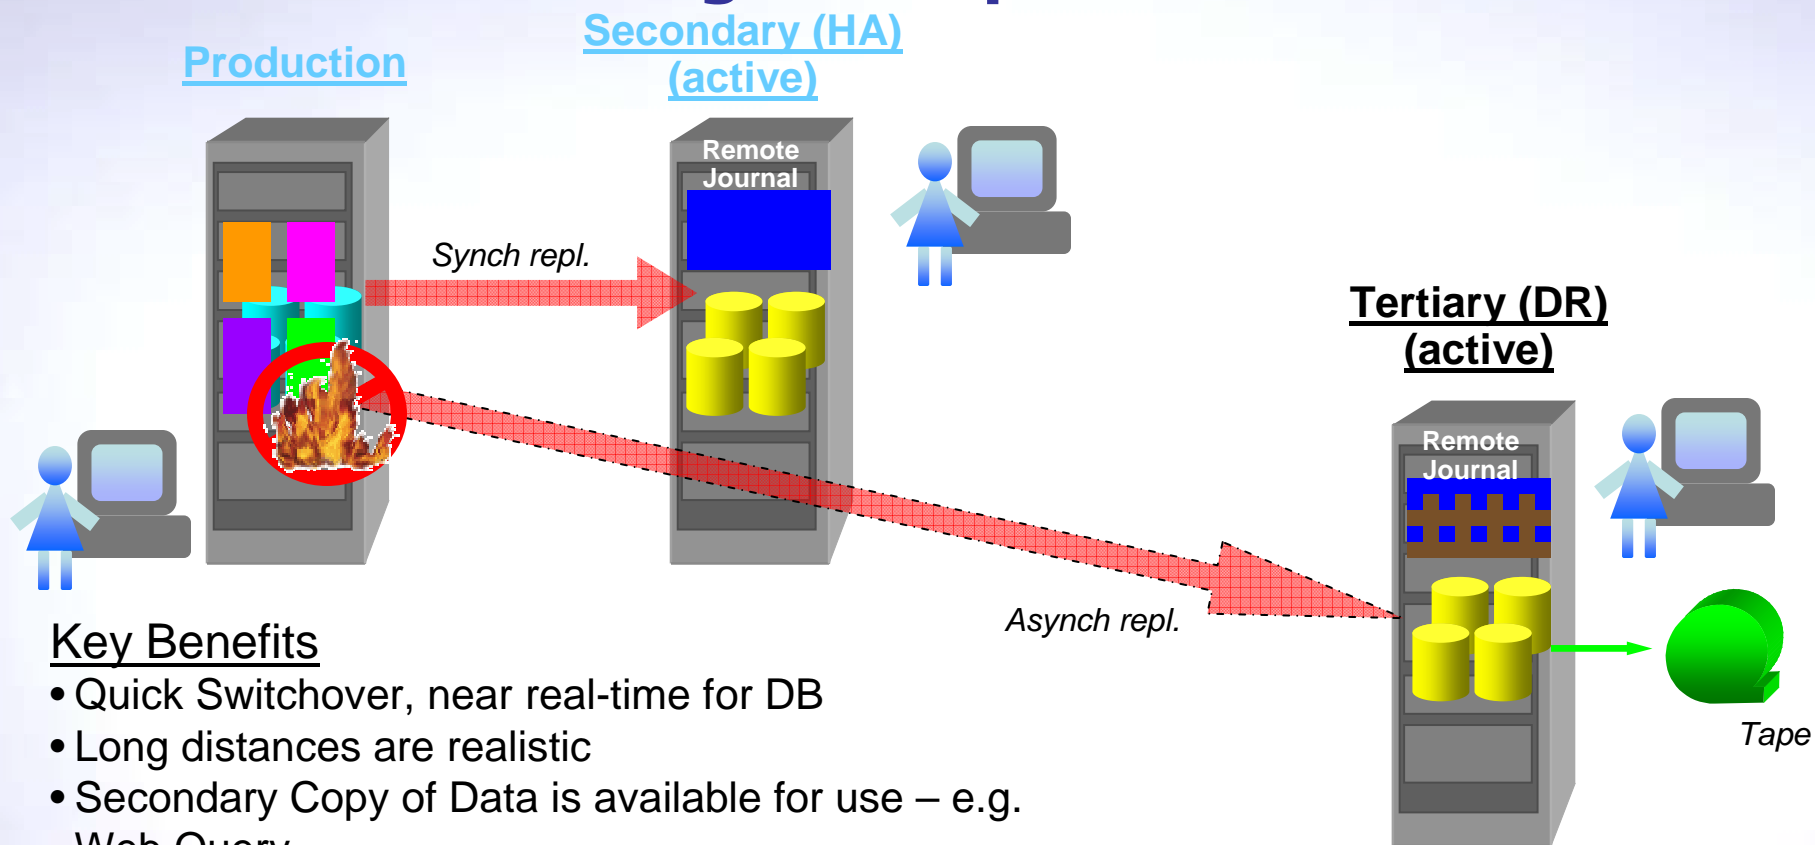

## IBM i HA/DR Offering Summary i6.1

	Logical Replication	IASP Clustering Integrated Storage	IASP Clustering SAN	Full System SAN Replication
IBM LPP Offering	<b>iCluster for i</b>	<b>PowerHA Geographic Mirroring</b>	<b>PowerHA Metro Mirror Global Mirror (for DR)</b>	<b>Global Mirror Metro Mirror</b>
IBM HW Offering	<b>IBM i CBU Integrated Storage</b>	<b>IBM i CBU Integrated Storage</b>	<b>IBM i CBU IBM DS8000,DS6000</b>	<b>IBM i CBU IBM DS8000, DS6000</b>
Best Fit	<b>Geographic Dispersion</b>  <b>Backup Server Data needs to be open for reporting or backup.</b>	<b>HA Operations (XSM) -Geographic Mirroring</b>	<b>HA Operations (XSM) -Metro Mirror</b>  <b>DR Operations (XSM) - Global Mirror*</b>	<b>Disaster Recovery</b>

THE NEW POWER EQUATION |

# iCluster for i: Logical Replication Software

## Key Benefits

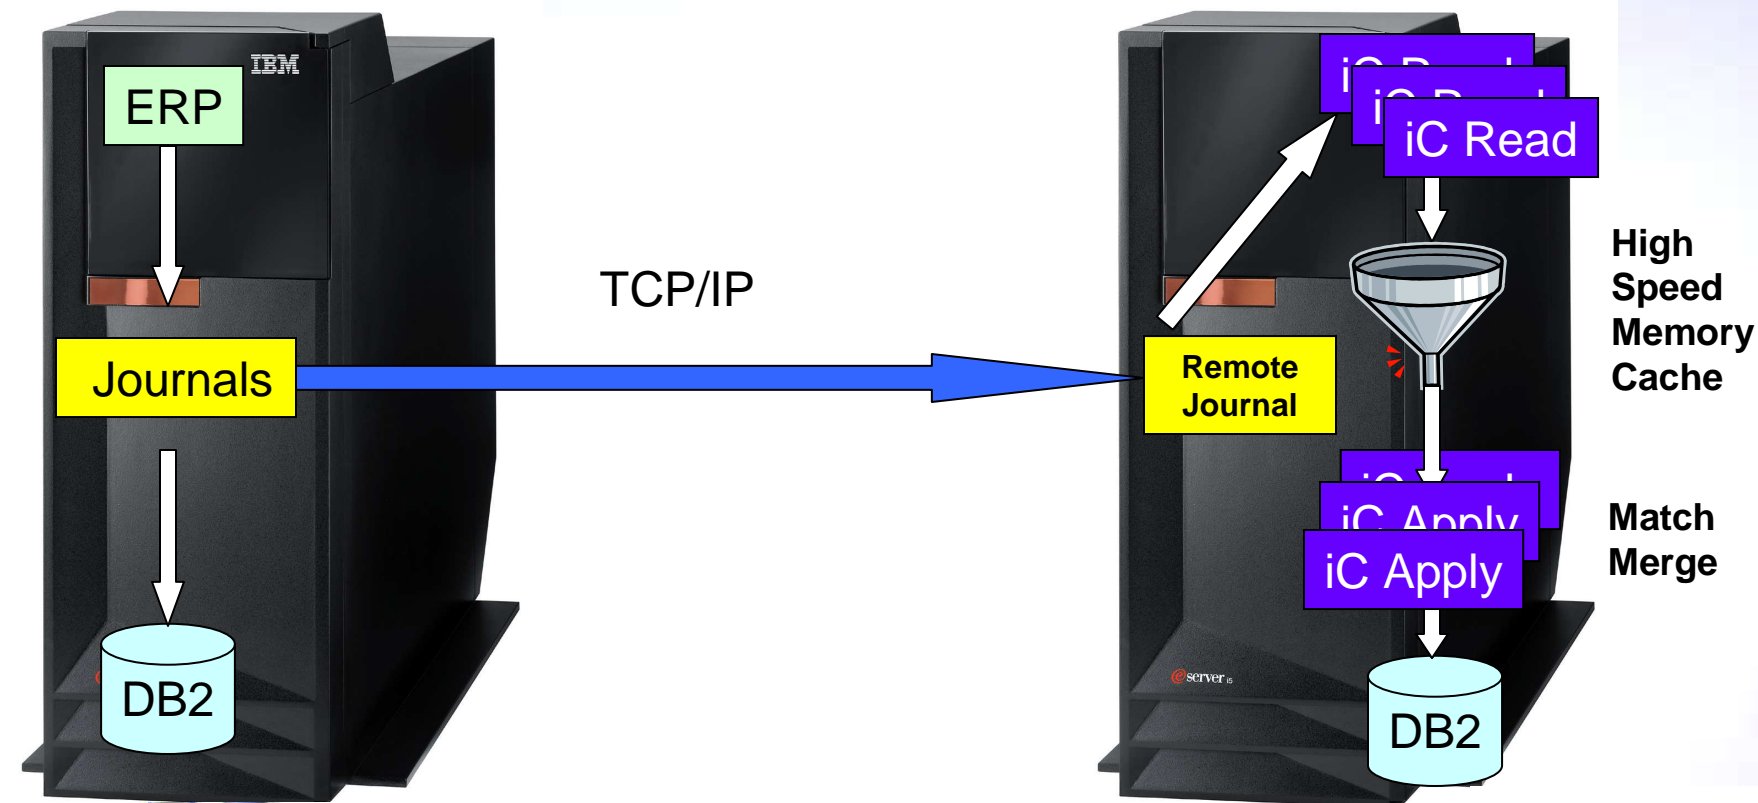

- Quick Switchover, near real-time for DB
- Long distances are realistic
- Secondary Copy of Data is available for use – e.g. Web Query
- Helps with Release Upgrades and PTFs
- Offline backups work well with BRMS
- Offers greatest hardware flexibility
- Uses iCluster automation or i Clusters
- Can cross different IBM i releases

*THE NEW POWER EQUATION |*

# iCluster Architecture Normal Mode

Primary Node/LPAR

Backup Node/LPAR

TCP/IP

High Speed Memory Cache

Match Merge

- Remote journal based
- High speed send and apply
- Configure once on source
- Source config pushed to target and ready for S...

*THE NEW POWER EQUATION* |

# What's it Look Like...JAVA GUI Administrator

The screenshot shows the iCluster Administrator-DEMO400A application window. The left pane displays a 'Cluster Hierarchy' tree with nodes like DEMO400A and DEMO400B, and a 'Replication Groups' section containing a 'MEDIAM' group. The right pane shows the 'Properties' for the 'MEDIAM' replication group, with a table listing various configuration parameters and their values.

Properties	Values
Replication Group Name:	MEDIAM
Group Type:	*REPL
Cluster Status:	*ACTIVE
Replication Status:	*ACTIVE
Target Library:	*PRIMARY
Journal Location:	*LOCAL
Group Description:	*** MEDIAM DND ***
Message Queue:	*NONE
Message Queue Library:	
Recovery Exposure:	*DISABLED
Recovery Journal Key:	
Commitment Control Level:	*NONE
Do Role Switch at Failover:	*YES
Check Journaling At Role Switch:	*NO
Exit Program Before Switchover:	*NONE
Exit Program Library Before Switchover:	
Exit Program After Switchover:	*NONE
Exit Program Library After Switchover:	
Exit Program Data:	
Default Database Journal:	HADJRN
Default Database Journal Library:	DMCLUSTER
Physical File Journal Images:	*AFTER
Polling Interval:	000500
Save Objects Used by Other Object:	*NO
Maximum Wait for Spool Activities:	000005
Maximum Wait for Spool Files:	000015
Recovery Domain:	double click to
Object Specifiers:	double click to
Suspended Objects:	Primary:0, Ba

Request Done

## Strengths

- 100% Java (quick response times)
- Real-Time event driven GUI
- Single point of administration
- Real-time status of nodes and groups
- Multiple-node support
- Run from a web browser!!
- Monitoring via BlackBerry

*THE NEW POWER EQUATION* |

# GUI Performance Monitor

The screenshot shows the 'iCluster Performance Monitor - PAYROLL' application window. A 'Refresh Details - HADJRN DMCLUS...' dialog box is open, displaying a progress bar at 85% and a 'Close' button. The main interface shows 'Primary Node: DMC400N' and 'Backup Node: DMC4000'. It features three panels: 'Source Status and Latency' with objects QAUDJRN QSYS and HADJRN DMCLUSTER; 'Staging Store' at 12% capacity; and 'Target Status and Latency' with objects QAUDJRN QSYS and HADJRN DMCLUSTER. Green arrows indicate data flow from source to staging store and then to target. A 'Request Done' status bar is visible at the bottom.

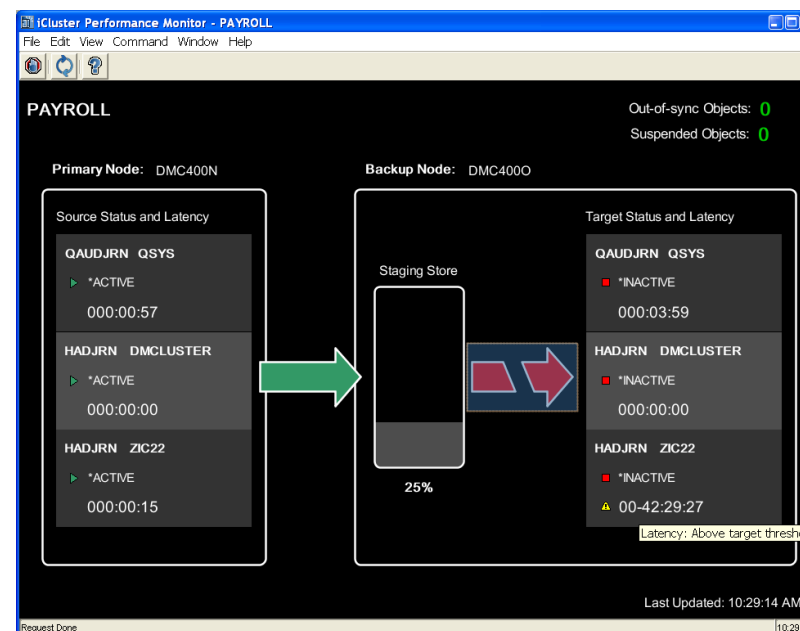

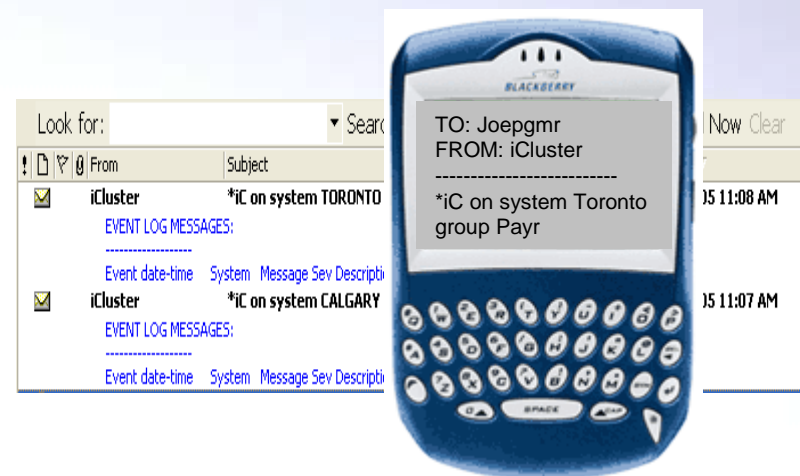

- ### Strengths
- Quick visual indicator of switch readiness
  - Operational capabilities
  - Single point of administration
  - Run from a web browser!!

*THE NEW POWER EQUATION* |

# Autonomics

## Strengths

- Integrity and readiness of backup via sync checks:
  - Consolidated many types of sync checks
  - Consolidated report
  - Continuous Sync Check
  - Physical file contents via hash
- Reduced administration
  - Automatic re-sync of suspended objects
- Increased awareness of HA status:
  - EMAIL sent for suspended objects and errors
  - Alarms and alerts when latency thresholds exceeded
  - Monitor indication of refreshes, reorgs, access path rebuilds files/members

THE NEW POWER EQUATION |

# iCluster Roadmap

(Note: 2011 enhancements subject to change and is not an official SOD)

## iCluster 2010 Enhancements

- Reporting enhancements
- New journal management & monitoring utility
- Usability enhancements
  - Event log improvements
  - DMAUTOCFG enhancements
- Performance enhancements
- Record level repair
- i7.1 Support

## iCluster 2011 Enhancements

- Further DMXtras tool migration (HSTRCST and HENDCST)
- New installation tools (ICTEMPLATE, ICRMTINST)
- New switching menu (ICSWITCH)
- Enhanced firewall support
- Websphere MQ 7.0 support
- Performance improvements
- GUI enhancements

iCluster 5.3 TBD 2011

iCluster 5.2 TL1 Q3 2010

HA Assist – Oct 20 2009

## HA Assist – 5733-HAA

- Compliments PowerHA 5761-HAS
- Single price (not tier based)
- Replicates objects in SYSBASE not supported by PowerHA
- Code base is iCluster
  - Requires 2 licenses of 5761-HAS per server
- Requires 1 license of Option 41 per server
- Requires i6.1
- NOT for standalone HA

# Special notices

This document was developed for IBM offerings in the United States as of the date of publication. IBM may not make these offerings available in other countries, and the information is subject to change without notice. Consult your local IBM business contact for information on the IBM offerings available in your area.

Information in this document concerning non-IBM products was obtained from the suppliers of these products or other public sources. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. Send license inquires, in writing, to IBM Director of Licensing, IBM Corporation, New Castle Drive, Armonk, NY 10504-1785 USA.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

The information contained in this document has not been submitted to any formal IBM test and is provided "AS IS" with no warranties or guarantees either expressed or implied.

All examples cited or described in this document are presented as illustrations of the manner in which some IBM products can be used and the results that may be achieved. Actual environmental costs and performance characteristics will vary depending on individual client configurations and conditions.

IBM Global Financing offerings are provided through IBM Credit Corporation in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension or withdrawal without notice.

IBM is not responsible for printing errors in this document that result in pricing or information inaccuracies.

All prices shown are IBM's United States suggested list prices and are subject to change without notice; reseller prices may vary.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

Any performance data contained in this document was determined in a controlled environment. Actual results may vary significantly and are dependent on many factors including system hardware configuration and software design and configuration. Some measurements quoted in this document may have been made on development-level systems. There is no guarantee these measurements will be the same on generally-available systems. Some measurements quoted in this document may have been estimated through extrapolation. Users of this document should verify the applicable data for their specific environment.
